Education

PES University Bengaluru
Bachelor of Technology in Computer Science *Graduating 2027 —* ***available for internship Jan–Jun 2027***

- Relevant coursework: DSA, Machine Learning, DBMS, Operating Systems, Linear Algebra, Probability & Statistics

Achievements

National 2nd Place, AMD Slingshot Challenge — INR 3,00,000 prize May 2026

- Ranked 2nd among **40,000+ registrations** and 4,000+ prototypes with CityOS, a geospatial tool for planning city facilities

Finalist (1 of 5 teams), Atos SRiJAN Hackathon Sep 2026

- Pitched OptiSolve's **proof-of-concept** to **Atos UKI & India leaders**, who showed interest in adoption and **internships**

Projects

SEBI Knowledge Graph Agent | *Python, LangGraph, MCP, MLflow, Pydantic, Neo4j, Docker* | **Agentic AI** GitHub

- An **AI agent** that turns **SEBI** (India's market regulator) rule PDFs into a **knowledge graph** and answers **plain-English** questions
- **LangGraph workflow** with **structured LLM output**; an **MCP server** with 6 **read-only tools** lets Claude or any agent query the graph; **MLflow tracing** of every step
- **Evals** (answer key + **LLM-as-a-judge**) caught real bugs; fixes raised extraction **F1 from 0.74 to 0.94**; **88%** answers correct

Aymora | *TypeScript, Fastify, PostgreSQL, pgvector, Redis, Gemini* | **Full Stack, in Production** GitHub

- An **AI matchmaking app**, live in the cloud: users fill a questionnaire, **Gemini** builds a personality profile, and **vector search** suggests compatible matches
- **REST API** integrating 5 services, with **JWT login**, chat, **rate limiting**, signed payment webhooks, and slow AI work run as **background jobs** with retries

OptiSolve-Docs | *Python, FastAPI, React, ChromaDB, Groq LLMs, pytest* | **RAG & GenAI** GitHub

- An **AI helpdesk assistant**: answers support tickets from the company's help articles and documents (**RAG**); sure answers go out automatically, unsure ones go to a **human**, and it **learns** from corrections
- Document upload (PDF, Word, text) with a **re-ranker model**; **0 wrong auto-replies** on 27 tricky questions; **19 tests**

shoe-check | *PyTorch, OpenCV, ONNX, Gradio* | **Computer Vision & Edge AI** GitHub

- Flags **blurry phone photos**: a **MobileNetV3** CNN trained on synthetic blur scored **95.6%** on 1,050 real photos (classic OpenCV: **89%**)
- Exported to **ONNX** for edge devices: **3.1 MB**, **5 ms** per photo on one CPU thread; tested int8 quantization

HeartGuard AI | *Python, Scikit-learn, XGBoost, BigQuery, Docker* | **Machine Learning** GitHub

- Capstone (**journal paper in preparation**): a **digital twin** that tracks heart-failure patients' daily vitals and flags decline
- **Random Forest** sorts each day into 5 clinical scenarios (**91.3%** held-out accuracy); fixed a bug that made error **34x** worse

AgriConnect | *Java 17, Spring Boot, MySQL* | **OOP & Design Patterns** GitHub

- A farm-to-consumer marketplace: **22 REST endpoints**, **SOLID** principles, patterns (**Strategy**, **Observer**, **Factory**, **Facade**)

Experience

Data & Analytics Engineering Intern — National Capital Region Transport Corp., New Delhi Jun 2025 – Aug 2025

- Built and deployed a real-time analytics dashboard (React, Node.js, Express, PostgreSQL) for the **PM e-Bus Sewa initiative**, **unifying 3+ fleet and ridership data sources** and cutting stakeholder time-to-insight from **hours to minutes**

Technical Skills

Programming Languages: Python, Java, TypeScript, JavaScript, SQL, C/C++
AI & LLMs: AI Agents, LangGraph, MCP, RAG, LLM Evals, Prompt Engineering, Embeddings, Vector Search, GPT, Gemini
Machine Learning: PyTorch, TensorFlow/Keras, OpenCV, Scikit-learn, XGBoost, CNNs, Transfer Learning, ONNX, Pandas
Backend & Data: FastAPI, Fastify, Spring Boot, Flask, Node.js, React, REST APIs, PostgreSQL, MySQL, Neo4j, Redis
Tools: Git/GitHub, Docker, GitHub Actions (CI/CD), pytest, MLflow, Jira/Agile, AI coding assistants (Claude Code)
Soft Skills: Ownership, Problem-Solving, Communication, Teamwork
